ANDESITE

FROM ANXIETY TO PRODUCTIVITY

THE CHALLENGE

- ✗ Too many AI options and no clear way to evaluate what works for your business.
- ✗ Hours spent on repetitive tasks that could be automated, with no obvious starting point.

IMAGINE INSTEAD

- ✓ Thinking clearly about AI without needing to become an expert in a fast-moving field.
- ✓ Finding real opportunities in your workflows—turning many repetitive tasks from minutes into seconds.
- ✓ Moving forward with a practical framework instead of guesswork.

So ultimately, you can use AI with confidence.

THE METHOD

AI Blueprint for Non-Tech Businesses

A practical five-step method for leaders who need clarity, not complexity.

It creates a shared understanding of business value and implementation effort—so the right opportunities rise to the top.

01 Understand

Start with your needs and workflows—not a preferred AI platform—and build a practical mental model of what AI can and cannot do.

02 Identify

Map relevant AI opportunities in your business.

03 Estimate

You estimate the value. I help you understand the effort.

04 Prioritize

Together, we rank and prioritize high-impact opportunities using our shared view of value and effort.

05 Implement

Decide whether to use, connect, build, replace, or avoid tools based on fit, then deploy an integration your team can use confidently.

Anxiety → **Productivity**

FROM RECURRING WORK TO REPEATABLE LEVERAGE

CLIENT WORKFLOW

Follow-Up & CRM

BEFORE	Switching among email, CRM, and spreadsheets; writing each follow-up from scratch.
CONNECT	GPT + Gmail + Attio draft personalized follow-ups and add leads to the CRM.
RESULT	More leads captured, more timely follow-ups, and less manual writing while retaining the client's voice.

LEARNING WORKFLOW

Continuous Call Improvement

BEFORE	Insights depend on manual notes and lessons are easy to lose before the next client call.
AUTOMATE	Meeting capture produces notes, then deeper analysis identifies patterns and specific improvements.
RESULT	A repeatable learning loop after every client conversation.
Used by me and by at least one client.	

INTRODUCING

Guided AI Integration

A guided engagement delivered through focused calls and hands-on integration work —designed to increase your team's confidence and productivity with AI within weeks.

FOUR FOCUSED SESSIONS

- ✓ AI capabilities opening call
- ✓ Opportunity scoping session
- ✓ Hands-on implementation session
- ✓ Final delivery and handoff call

CLEAR DECISIONS

- ✓ Practical AI capabilities briefing
- ✓ Workflow and opportunity inventory
- ✓ Value and effort assessment
- ✓ Prioritized opportunity roadmap
- ✓ Personalized tool and approach recommendation

INTEGRATION & HANDOFF

- ✓ One high-impact AI integration
- ✓ Demonstration and usage guidance
- ✓ Integration documentation
- ✓ Personalized decision-and-handoff report
- ✓ Recommended next steps

\$2,000

Four 90-minute sessions
Hands-on integration of a high-impact AI opportunity and final delivery.

Designed to deliver
results within weeks
